PROFESSIONAL SUMMARY

Full-stack engineer with 6+ years building production systems end-to-end, back-end through UI. TypeScript across the full stack (Node.js, NestJS, Next.js, React), with Go powering a multi-chain block indexer. Currently on a B2B crypto-to-fiat payment platform: wallet integrations, RPC services, on/off-ramp, and KYC. Comfortable prototyping fast to prove a feature out, then hardening it with tests, edge cases, and outage recovery. AWS certified. Works remotely from GMT+7.

CORE COMPETENCIES

TypeScript (Full Stack)

Node.js / NestJS

EVM / On-Chain Integration

React / Next.js

Internal Platform Tooling

Go

REST APIs & Webhooks

PostgreSQL / Redis

Web3 Wallets & RPC

AWS & CI/CD

WORK EXPERIENCE

Nespay / PT Webtiga Teknologi Utama Apr 2025 - Jul 2026

Mid-level Software Developer

B2B multi-chain crypto-to-fiat payment platform. Team of 7.

- Built TypeScript end-to-end: NestJS backend services and the React/Next.js Backoffice Dashboard for user and admin interfaces, owning both sides of the API contract.
- Contributed to and operate the team's multi-chain block indexer in Go - internal platform tooling the rest of the team builds on. Forward indexer for real-time block scanning, configurable backward indexer for gap backfilling and outage recovery, and cleanup jobs that prune stale data to keep PostgreSQL lean. Redis dedup so each transaction is reported once; the NestJS backend consumes its webhooks.
- Delivered wallet transactions and external wallet integrations (Xellar, Privy), invoice management, and RPC service integration for on-chain payment flows.
- Integrated KYC compliance (Sumsub, Kredibel) into the transaction lifecycle.
- Developed core application architecture; set up AWS authorization and CI/CD pipelines (GitHub Actions on EC2).
- Conducted peer code reviews for high-quality, scalable code.

ION Feb 2020 - Dec 2024

Full Stack Software Engineer

ConnectX (Jan 2023 - Dec 2024, team of 10) - multi-tenant rebuild of the work management platform. Connection (Feb 2020 - Dec 2022, team of 12) - internal work management app.

- Built a natural-language people search on ConnectX, similar to LinkedIn search: free text like "who excels in web design with Framer and Base44 in London" returns relevance-ranked results.
- Enhanced praise and skill features: connected praise to static data for department/division filters and leaderboards, aggregated skill scores, and linked skills with praise to power skill-matched people search.
- Built an integration app to sync data from HRIS to the platform.
- Improved time-off and work timeline features: simplified bulk approvals and integrated time-off with public holidays and employee work days.
- Stabilized form component behavior and validation across the app; maintained a large legacy codebase.

Ultra Voucher / PT Trimegah Karya Pratama Tbk

Nov 2018 - Jan 2020

Full Stack Web Developer

Team of 15.

- Built the CG Voucher Generator: an internal web app generating digital voucher codes for affiliate providers, tracking voucher status, and producing reports. Vouchers were previously supplied by providers and tracked by hand across separate Excel sheets with no status visibility.
- Developed various dashboard apps to answer business needs.

PROJECTS

Multi-Chain Block Indexer Go

Relay service moving on-chain payment data to the backend. Forward indexer for live blocks, configurable backward indexer for gap backfilling after outages, periodic cleanup to keep PostgreSQL lean, Redis dedup for exactly-once reporting.

Go, PostgreSQL, Redis, webhooks, EVM RPC

EDU Chain Hackathon - DeFi Track Solidity

Placed third in the DeFi track (May 2025), building and demoing an on-chain project under a fixed hackathon window.

Solidity/EVM ecosystem, Web3 tooling

Nespay Backoffice Dashboard TypeScript

Admin and user-facing surfaces for a B2B payments platform: wallet transactions, invoicing, and KYC flows, built in React/Next.js against the NestJS APIs behind them.

TypeScript, React, Next.js, NestJS, REST

EDUCATION

B.S. Geophysical Engineering

Aug 2011 - Sep 2015

Bandung Institute of Technology

JavaScript Fullstack Immersive Program

Nov 2018

Hacktiv8

CERTIFICATIONS

AWS Certified Cloud Practitioner

Sep 2024

Amazon Web Services

SKILLS

Languages: TypeScript, JavaScript (8 yrs), Go, SQL, Python (basic) **Frontend:** React.js, Next.js, Angular, Vue

Backend: Node.js, NestJS, REST APIs, webhooks, worker/queue design, async pipelines

Web3: Wallet integrations (Xellar, Privy), EVM RPC services, crypto-to-fiat on/off-ramp, KYC (Sumsb)

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Neo4j

Cloud & DevOps: AWS (Certified Cloud Practitioner), Docker, GitHub Actions CI/CD, Ansible, Grafana

Testing: Playwright (3+ yrs), Selenium, Mocha **Spoken:** English (Professional, IELTS 7.5), Korean (Conversational), Indonesian (Native)
