

Hana Aliyah Mufidah

Full Stack Developer

Yogyakarta, ID | +62 858-1099-4772
mufidah.hanaaliyah@gmail.com

Highly motivated individual with experience in building scalable applications for work management and B2B payment systems (Web 2.5). Proficient in both front-end and back-end development, utilizing technologies such as React.js, Next.js, Node.js, and AWS. Experienced in integrating traditional and blockchain-based payment systems, with a focus on crypto-to-fiat on-/off-ramp solutions. Passionate about delivering reliable, secure solutions while collaborating with teams to ensure high code quality and continuous improvement.

Professional Experience

Mid-level Software Developer

Nespay

April 2025 - Present

- Developed core application architecture and set up **AWS authorization, CI/CD pipelines** (GitHub Actions on EC2).
- Led the development of **Backoffice Dashboard** (React.js/Next.js) and backend server for both user and admin interfaces.
- Delivered key features including **wallet transactions, invoice management, and external wallet integrations** (Xellar, Privy).
- Integrated **RPC services and KYC compliance** (Sumsud, Kredibel).
- Conducted **peer code reviews** to maintain high-quality, scalable code.

Full Stack Software Engineer

ION

February 2020 - December 2024

- Maintained **legacy codebase** while collaborating on the design and development of work management web apps.
- Built an **integration app** to sync data from HRIS to the platform.
- Enhanced **praise and endorsement features**, connecting praise with static data to enable filters and leaderboards by department/division and match skills for people search.
- Improved **employee time-off system** and work timeline, simplifying bulk approvals and integrating time-off data with public holidays and objectives.
- Stabilized **input component behavior** and validation across the application.

Full Stack Web Developer

Ultra Voucher

November 2018 - January 2020

- Develop various dashboard apps to answer business needs.
- Highlight project: Create a web app for generating digital voucher codes to be used by affiliate voucher providers, keeping track of voucher status, and generating reports. Previously, vouchers sold by this company were given by providers, stored in separated excel sheets manually, and status cannot be tracked.

Education

Bachelor of Science (B.S.) in Geophysical Engineering | September 2015
Bandung Institute of Technology

Key Skills

Full stack JavaScript (Nest.js, Next.js)

Database management system (MySQL, PostgreSQL, MongoDB, Neo4j, Elasticsearch, Redis)

AWS cloud services

DevOps (Docker, Ansible, Vagrant)

End-to-end testing (Nightwatch, Selenium, Mocha)

Accomplishments

Win 3rd place for DeFi Track

May 2025

EDU Chain Hackathon

Certifications

AWS Certified Cloud Practitioner

September 2024

AWS
