SUMMARY

Backend and infrastructure-minded engineer with 6+ years building and operating scalable systems. Hands-on with AWS, CI/CD (GitHub Actions), Ansible, and Docker, plus production Go services and TypeScript/Node.js backends. Comfortable across the stack with Next.js and React on the front end and MySQL, PostgreSQL, and Redis behind it. Focused on reliability, recovery, and clean, well-reviewed code.

CORE COMPETENCIES

AWS Cloud & Infrastructure

CI/CD (GitHub Actions)

Go (Backend & Indexers)

TypeScript / Node.js

Next.js / React.js

Ansible & Docker

MySQL · PostgreSQL · Redis

System Reliability & Recovery

EXPERIENCE

Nespay Apr 2025 - Jul 2026

Mid-level Software Developer · Remote

- Set up **AWS** authorization and CI/CD pipelines (**GitHub Actions** deploying to EC2) for the core platform.
- Built and operate a multi-chain block indexer in **Go**: a forward indexer for real-time block scanning, a configurable backward indexer for gap backfilling and outage recovery, and periodic cleanup jobs that prune stale data to keep **PostgreSQL** lean. **Redis** dedup so each transaction is reported once.
- Delivered wallet transactions, invoice management, and external wallet integrations (Xellar, Privy); integrated RPC services and KYC compliance (Sumsb, Kredibel).
- Led the Backoffice Dashboard (**React.js** / **Next.js**) and its **Node.js** backend for user and admin interfaces.
- Conducted peer code reviews to keep the codebase scalable and high quality.

ION Feb 2020 - Dec 2024

Full Stack Software Engineer · Remote

- Maintained a large legacy work-management platform and built an integration app syncing HRIS data into it.
- Enhanced praise/endorsement features (department leaderboards, skill-matched people search) and the employee time-off system.
- Stabilized input-component behavior and validation across the application.

Ultra Voucher Nov 2018 - Jan 2020

Full Stack Web Developer

- Built dashboard apps for business operations, including a digital-voucher-code generator for affiliate providers with status tracking and reporting (replacing a manual Excel process).

PROJECTS

Multi-chain Block Indexer Go · Redis · PostgreSQL

Production indexer relaying on-chain payment data to the backend. Forward + backward indexers handle real-time scanning and outage recovery; cleanup jobs keep the database lean; Redis dedup guarantees once-only reporting.

EDUCATION

B.S. Geophysical Engineering · Bandung Institute of Technology 2015

JavaScript Fullstack Immersive · Hacktiv8 2018

CERTIFICATIONS & AWARDS

AWS Certified Cloud Practitioner · AWS Sep 2024

3rd place, DeFi Track · EDU Chain Hackathon May 2025

SKILLS

Languages: TypeScript, JavaScript, Go **Backend:** Node.js, Nest.js, REST APIs **Frontend:** Next.js, React.js

Cloud & DevOps: AWS, Docker, Ansible, GitHub Actions (CI/CD) **Data:** MySQL, PostgreSQL, Redis, MongoDB, Elasticsearch

Web3: On-chain indexing, wallet integrations (Xellar, Privy), RPC, KYC (Sumsb)
