

Hana Aliyah Mufidah

Backend Engineer · Web3 / Wallets · Node.js

+62 858-1099-4772 | aliyanamu@gmail.com | linkedin.com/in/hana-aliyah-mufidah | Yogyakarta, Indonesia (Remote)

PROFESSIONAL SUMMARY

Backend-leaning full stack engineer with 7+ years of Node.js and JavaScript experience building service-oriented platforms. Currently lead architecture, AWS infrastructure, and backend for Nespay's B2B crypto-to-fiat payment platform - wallet transactions, MySQL and MongoDB, KYC, and RPC integrations with security as a first-class concern. Active Web3 builder: 3rd place at the EDU Chain Hackathon DeFi Track (May 2025) and ongoing freelance work on wallet integrations.

CORE COMPETENCIES

Node.js / JavaScript

Microservices

MySQL

MongoDB

Wallet Integrations

Web3 / P2P

Security & KYC

AWS & CI/CD

WORK EXPERIENCE

Nespay April 2025 - Present

Mid-level Software Developer - Backend & Architecture

- Designed core backend architecture for a B2B crypto-to-fiat payment platform; service-oriented Node.js services for user and admin flows.
- Built wallet transaction services and external wallet integrations (Xellar, Privy); integrated RPC services for on-/off-ramp.
- Modeled data across MySQL (ledger, invoices) and MongoDB (KYC payloads, audit logs).
- Set up AWS authorization (IAM least-privilege) and CI/CD pipelines (GitHub Actions on EC2); enforced security best practices across KYC providers (Sumsu, Kredibel).
- Led development of the Backoffice Dashboard (React.js / Next.js) and ran peer code reviews to maintain code quality.

ION February 2020 - December 2024

Full Stack Software Engineer

- Maintained and extended a complex enterprise work-management platform with 5 years of legacy code; shipped without breaking deployed user flows.
- Built a service to sync HRIS data into the platform; integrated time-off data with public holidays and objectives.
- Enhanced praise and endorsement features - connected to static reference data for filters, leaderboards, and skill-based people search.
- Improved bulk approvals for time-off and stabilized input component validation across the application.

Ultra Voucher December 2018 - January 2020

Full Stack Web Developer

- Built a digital voucher generation, tracking, and reporting web app - replaced an error-prone Excel-based process for affiliate voucher providers.
- Shipped multiple internal dashboard apps tailored to specific business operations needs.

Sosial Bisnis Indonesia December 2017 - June 2018

Frontend Web Developer

PROJECTS

Nespay Backoffice Dashboard Web3 · Wallets

Core architecture, backend services, and admin UI for a B2B crypto-to-fiat payment platform. Wallet transactions, invoice management, KYC compliance, and RPC integrations on Node.js + MySQL + MongoDB + AWS.

EDU Chain Hackathon - DeFi Track 3rd Place · May 2025

Solidity smart contracts and on-chain settlement for a DeFi product shipped end-to-end in a single weekend.

EDUCATION

B.S. Geological/Geophysical Engineering, Institut Teknologi Bandung	2011 - 2015
JavaScript Fullstack Immersive Program, Hacktiv8	November 2018

CERTIFICATIONS

AWS Certified Cloud Practitioner - Amazon Web Services	Sep 2024 - Sep 2027
EFSET Express - High Proficiency (CEFR C1/C2)	-
IELTS - English Proficiency	May 2017

SKILLS

- Backend:** Node.js, JavaScript, Nest.js, REST APIs, microservice integrations
- Databases:** MySQL, MongoDB, PostgreSQL, Redis, Elasticsearch, Neo4j
- Web3 / Wallets:** Solidity, crypto-to-fiat on-/off-ramp, wallet integrations (Xellar, Privy), KYC (Sumsub, Kredibel), RPC services
- Cloud & DevOps:** AWS (EC2, IAM, CI/CD via GitHub Actions), Docker, Ansible, Vagrant
- Frontend:** React.js, Next.js
- Testing:** Nightwatch, Selenium, Mocha
- Languages:** English (Professional, C1/C2), Indonesian (Native), Korean (Conversational)
