

Hana Aliyah Mufidah

Senior Frontend Engineer · React / KYC · Web3

+62 858-1099-4772 | aliyanamu@gmail.com | linkedin.com/in/hana-aliyah-mufidah | Yogyakarta, Indonesia (Remote)

PROFESSIONAL SUMMARY

Senior frontend engineer with 7+ years of JavaScript / ES6+ experience - React, Next.js, and condition-heavy UI logic. Currently lead the Backoffice Dashboard at Nespay (B2B crypto-to-fiat platform), including KYC compliance flows integrating Sumsub and Kredibel and RPC-based provider APIs. Five prior years on a complex enterprise web platform at ION, with deep practice in debugging hidden issues, input validation, and shipping into a long-lived codebase without regressions.

CORE COMPETENCIES

React / Next.js

JavaScript ES6+

KYC Compliance UX

RPC & REST APIs

Node.js + MongoDB

High-Availability Apps

Frontend Debugging

Build Tools & CI/CD

WORK EXPERIENCE

Nespay April 2025 - Present

Software Developer - Frontend Lead, Backoffice Dashboard

- Lead the Backoffice Dashboard (React.js / Next.js) and customer-facing flows for a B2B crypto-to-fiat payment platform - condition-heavy UI across user types and KYC states.
- Shipped KYC compliance UX integrating Sumsub and Kredibel - provider-switch logic, signed callbacks, retry and error states surfaced cleanly to users and compliance officers.
- Wired the frontend to RPC and REST APIs for wallet transactions, invoice management, and external wallet integrations (Xellar, Privy).
- Stood up the supporting Node.js backend with MongoDB and MySQL so the app runs end-to-end locally; configured AWS auth and CI/CD (GitHub Actions on EC2).
- Ran peer code reviews and enforced security best practices across the KYC and wallet flows.

ION February 2020 - December 2024

Full Stack Software Engineer (Frontend-leaning)

- Five years on a complex enterprise work-management web app - shipped new features into a long-lived React/JS codebase without breaking deployed flows.
- Stabilized input component behavior and validation across the application - debugged hidden issues across controlled-component edge cases, browser quirks, and condition-based rendering.
- Built condition-based UI logic for praise and endorsement features - filters, leaderboards, and skill-based people search across departments, divisions, and user types.
- Improved time-off and work-timeline UX - bulk approvals and integration with public holidays and objectives.
- Built a service to sync HRIS data into the platform.

Ultra Voucher December 2018 - January 2020

Full Stack Web Developer

- Built a digital voucher generation, tracking, and reporting web app - replaced an error-prone Excel-based process for affiliate voucher providers.
- Shipped multiple internal dashboard apps tailored to specific business operations needs.

Sosial Bisnis Indonesia December 2017 - June 2018

Frontend Web Developer

PROJECTS

Nespay Backoffice Dashboard React · KYC · Web3

Lead frontend (React / Next.js) for a B2B crypto-to-fiat platform. KYC compliance UX with Sumsub and Kredibel, wallet integration screens (Xellar, Privy), and RPC-based on-/off-ramp flows. Backed by Node.js + MongoDB + MySQL on AWS.

EDU Chain Hackathon - DeFi Track 3rd Place · May 2025

Solidity smart contracts and on-chain settlement for a DeFi product shipped end-to-end in a single weekend.

EDUCATION

B.S. Geological/Geophysical Engineering, Institut Teknologi Bandung 2011 - 2015

JavaScript Fullstack Immersive Program, Hacktiv8 November 2018

CERTIFICATIONS

AWS Certified Cloud Practitioner - Amazon Web Services Sep 2024 - Sep 2027

EFSET Express - High Proficiency (CEFR C1/C2) -

IELTS - English Proficiency May 2017

SKILLS

- Frontend:** React.js, Next.js, JavaScript ES6+, condition-based UI logic, frontend debugging (network, source, breakpoints), modern build tools
- KYC & Compliance:** Sumsub, Kredibel, signed-callback handling, provider-switch UX
- APIs:** RESTful, RPC services, integrations across wallet and KYC providers
- Backend (run-the-app):** Node.js, Nest.js, MongoDB, MySQL, PostgreSQL, Redis
- Web3:** Solidity, crypto-to-fiat on-/off-ramp, wallet integrations (Xellar, Privy)
- Cloud & DevOps:** AWS (EC2, IAM, CI/CD via GitHub Actions), Docker, Ansible, Vagrant
- Testing:** Nightwatch, Selenium, Mocha
- Languages:** English (Professional, C1/C2), Indonesian (Native), Korean (Conversational)
